

Project Management

State of Kansas

The course is designed to elevate understanding of risk management concepts and apply those concepts to the participants' current projects.

Risk Management

COURSE DESCRIPTION

The course content is developed such that it guides the participant through applying risk management to the participants' projects. The material introduces a common risk management process framework, supplies the participants with a number of worksheets and templates, and challenges participants to identify barriers to successfully implementing risk management on their project. Extensive action planning is conducted throughout the course, with a focus on applying the techniques and tools in the practical setting.

OBJECTIVES

- Understand what is and is not a risk
- Develop a foundation / framework that supports you applying risk management to your projects
- Be equipped with tools to support practical risk management
- Directly apply risk management techniques and tools to your current project
- Have an action plan for taking risk management concepts back to your project team

PREREQUISITES

Participant should be a certified State of Kansas Project Manager; seasoned Project Manager; or actively working on a project upon which they may bring to bear the risk management principles. If the participant is working on a project, they do not have to be in the Project Manager role on their project.
